

Infor Query & Analysis

Insight on demand

Knowing what direction to take in business is essential. Whether it's acquiring new companies, launching new products, finding new ways to beat the competition, or other avenues of pursuit, it's important to know where you're headed and why. That takes real business intelligence and reporting proficiency, so that employees at all levels of your organization can have immediate access to the information that's relevant to their roles and tasks to make informed recommendations and strategic decisions.

With Infor SunSystems® Query & Analysis, anyone in your organization can get 24/7 access to real-time information to make the right decisions at the right time. Technical and non-technical users alike can easily get the precise information they need and generate reports with the intuitive and efficient interface. And with deep connections to data throughout your organization, employees from all lines of business-including finance, sales, human resources, and any other department-can harness this powerful, ad-hoc querying and analysis tool.

Information when you need it

More than 10,000 customers from organizations of all sizes around the world use Infor® SunSystems Query & Analysis to help them make business intelligence and reporting easier and more accurate. With reporting tools that include compliance and regulatory factors, Infor SunSystems Query & Analysis gives you the information you need, where and when you need it, fast and efficiently. And because it's built on the same technology platform as other Infor solutions, you'll have the flexibility and the scalability to quickly integrate Infor SunSystems Query & Analysis with your existing Infor and non-Infor solutions, easily make changes to meet your growing business needs, and even expand to more robust querying and analysis tools.

With Infor SunSystems Query & Analysis, anyone in your organization can get 24/7 access to real-time information to make the right decisions at the right time.

Power made easy

With Infor Query & Analysis, you get familiar looking desktop applications, so you can quickly and efficiently create reports that highlight trends, patterns, and exceptions. Users can get up-and-running quickly with minimal training and technical skill because the software is integrated with Excel®. Yet, you still get dynamic, multi-language, multicurrency, business intelligence tools that are powerful, flexible, secure, easy to use, and are in a consistent interface throughout the software. And since the software needs minimal IT support and involvement, maintenance is easier, too.

You can perform queries the same way across multiple applications and pull the resulting data into a single report. You can quickly and easily analyze business data, measure performance, and be more reactive with access to real-time data. You can make inquiries in many ways, and get multiple options for visualizing data, including multidimensional cubes and charts.

The Infor SunSystems Query & Analysis family of ad-hoc query and reporting tools includes:

Infor BI Query & Analysis This web service enabled and cloud ready solution, with unparalleled data visualization functionality, will turn information into insight and allow you to turn that insight into action - all in real time. With Infor BI Query & Analysis, anyone in your organization can get 24/7 access to real-time information to make informed and strategic decisions with confidence anytime and anywhere. Technical and

non-technical users alike can easily access data from disparate sources across the organization and generate “boardroom ready” reports leveraging the intuitive and efficient interface.

With a focus on reporting and analysis, Infor BI Query & Analysis provides you with a single working area within the popular MS Excel environment allowing you the flexibility to drill down, breakout and expand views at both a detailed transactional level and/or summary level. Employees from all lines of business-including finance, sales, human resources, and any other department-can harness this powerful, ad-hoc querying and analysis tool to increase efficiency and streamline operations.

Get a top-down view of your entire business with this dynamic analysis and reporting application’s powerful analytical capabilities, such as drilldown, expand, breakout. You can easily analyze trends, problems, and opportunities that are often concealed within corporate transactional data. You can save frequently used analysis procedures and replay them in the future.

Infor Q & A Context Empower your employees with this centralized platform for collaboration, where information is shared and conversations are organized into streams across the enterprise. With embedded business intelligence, real-time information, and custom visualizations, you’ll increase collaboration and streamline the decision-making process.

Infor Query & Analysis BI Dashboards Approve transactions, drill down to transactional details, and

monitor business performance anytime, from anywhere with this intuitive and easy-to-use, touch-screen-enabled, Apple iPad® app. You’ll gain 24/7 access to your most critical information and operations with self-service reporting and dashboards. You’ll redefine the way you interact with enterprise information and increase the speed of your overall business.

Infor Q & A Alert Enhance your ability to identify, analyze, and report on performance and trends concealed within the database with this query and analysis tool. You can create, edit, and schedule tasks, and then let this tool automatically manage, run, and distribute reports based on scheduled events.

Infor Q & A Datalink Studio Infor Query & Analysis includes a number of pre-built, dynamic, intelligent business logic metadata layers that link directly to the enterprise data of other systems. You can also create and modify your own metadata layers with Infor Q & A Datalink Studio to allow employees at all levels to more easily access data on their own.

Empower your employees

With the Infor SunSystems Query & Analysis family of ad-hoc query and reporting tools, you get intuitive analytics, business intelligence, reporting, and alerting capabilities for non-technical business users that can be used with any data source. Working in familiar environment, your employees will be empowered to find the information they need to make better decisions, faster.
