Introduction

Epicor FP&A and IP&O are designed to help manufacturing businesses like yours achieve greater efficiency and accuracy in financial planning, reporting, and inventory management. With these powerful tools, you can make informed decisions, optimize your operations, and drive growth.

Key Benefits

Enhanced Financial Planning

With Epicor FP&A, you gain access to a comprehensive reporting & analysis, advanced budgeting, financial forecasting, and financial consolidation capabilities. Easily customize reports, drill down to transaction details, and leverage machine learning for accurate predictions. Enjoy quick time to value with pre-built models and automated best-practice setups.

Optimized Inventory Management

Epicor IP&O uses AI-driven demand forecasting and stocking policy optimization to reduce excess stock, prevent stockouts, and enhance service levels. Make data-driven decisions to maximize returns on your inventory investments. The system auto-selects optimal forecast methods and leverages probabilistic modeling for robust predictions.

Seamless Integration

Both FP&A and IP&O integrate seamlessly with your existing ERP system, providing a complete platform for financial and inventory planning. Experience quick time to value with easy implementation and user-friendly interfaces. The solutions support multi-company, multi-currency, and multi-scenario planning.

Industries and Subverticals

- Automotive
- Aerospace & Defense
- Electronics
- Industrial Machinery
- Medical Devices
- Metal Fabrication
- Plastics & Rubber
- Textiles

Product Features - Epicor FP&A Reporting & Analysis

Generate comprehensive financial and non-financial reports with customizable templates and real-time data. Support for web and Excel interfaces allows you to create and customize reports easily.

Budgeting

Create detailed budgets with ease, leveraging machine learning for accurate predictions. Enjoy the streamlined workflow and approval hierarchies that Epicor FP&A enforces, and improve team collaboration during budgeting season through collaborative capabilities like version control, commenting, approvals, spreading and many more.

Financial Forecasting

Predict future financial performance accurately using advanced forecasting models in Epicor FP&A. Easily create and compare forecasts, and track forecast errors, and identify exceptions for continuous improvement.

Consolidation

Automate the consolidation process, including currency translations and multi-entity alignment. Align entities based on key performance metrics with unlimited what-if analysis.

Drill-to-Details

Drill down to transaction details and invoice trackers for deeper insights. Powerful drill to periodic postings and invoices provides greater transparency.

Excel and Web Interfaces

Create and customize reports using familiar Excel and web interfaces. The Excel interface augments your existing skills while providing direct access to all data.

Multi-Management

Support for multi-company, multi-currency, and multi-scenario planning. Easily manage complex organizational structures with high performance.

Product Features - Epicor IP&O Demand Forecasting

Forecast demand using AI-driven models that auto-select optimal methods and leverage probabilistic forecasting. Account for trends and seasonality out-of-the-box.

Stocking Policy Optimization

Optimize inventory stocking policies to reduce excess stock and prevent stockouts. “What-if” planning predicts KPIs for different inventory policies.

Integration with ERP

Seamlessly integrate with your ERP system and extend its capabilities for unified inventory management. Re-calibrate stocking parameters more often for better returns on inventory assets.

User-Friendly Interface

Enjoy an intuitive and easy-to-use web interface for managing inventory. Easily compare statistical, customer, and sales forecasts.

Probabilistic Modeling

Simulate thousands of demand scenarios to stress test policies and refine strategies. Predict the final impact of alternative planning policies.

Intermittent Demand Planning

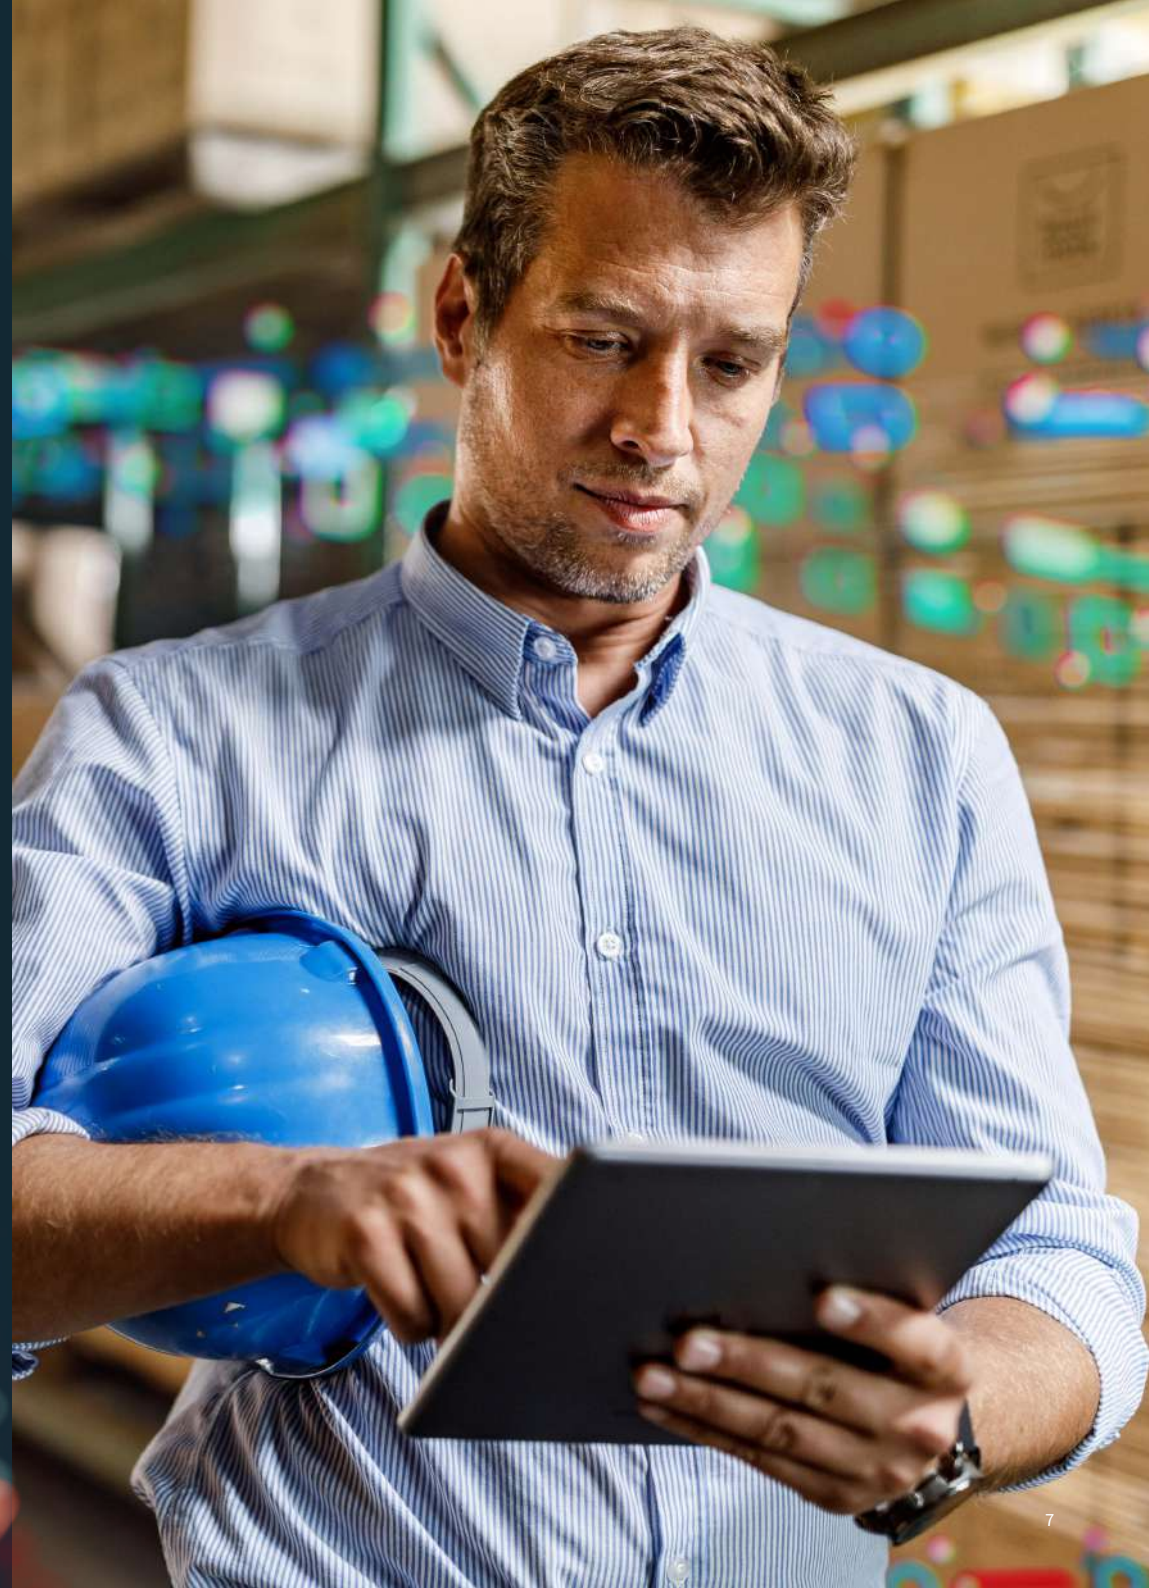

Handle the hardest to forecast items with specialized algorithms. Optimize service levels and stocking policies for intermittent demand.

Lead Time Analysis

Track supplier and product lead times to improve planning accuracy. Proactively adjust stock levels based on lead time variability.

Two Robust Solutions Enhancing One Cognitive ERP

By integrating Epicor FP&A and IP&O with your existing ERP system, you unlock a new level of financial and operational excellence. These advanced solutions provide you with the tools to make data-driven decisions, enhance financial planning, and optimize inventory management. With Epicor FP&A, you can streamline your budgeting and forecasting processes, ensuring financial accuracy and agility. Epicor IP&O empowers you to maintain optimal stock levels, reduce excess inventory, and prevent stockouts, ultimately improving service levels and customer satisfaction. Together, these solutions help you achieve greater efficiency, reduce costs, and drive business growth. Embrace the power of Epicor FP&A and IP&O to transform your business.

We're here for the hard-working businesses that keep the world turning. You're the companies that make, move, and sell the things we all need. Trust Epicor to help you do business better. Your industry is our industry, and we understand you better than anyone. By working hand-in-hand, we get to know your business almost as well as you do. Our innovative industry solution sets are carefully built to fit your needs and respond flexibly to your fast-changing reality. We accelerate ambitions, whether you want to grow and transform, or simply become more productive and effective.

That's what makes us the essential partner to the world's most essential businesses.
